

UKI Manager

Festival Team enhancements.

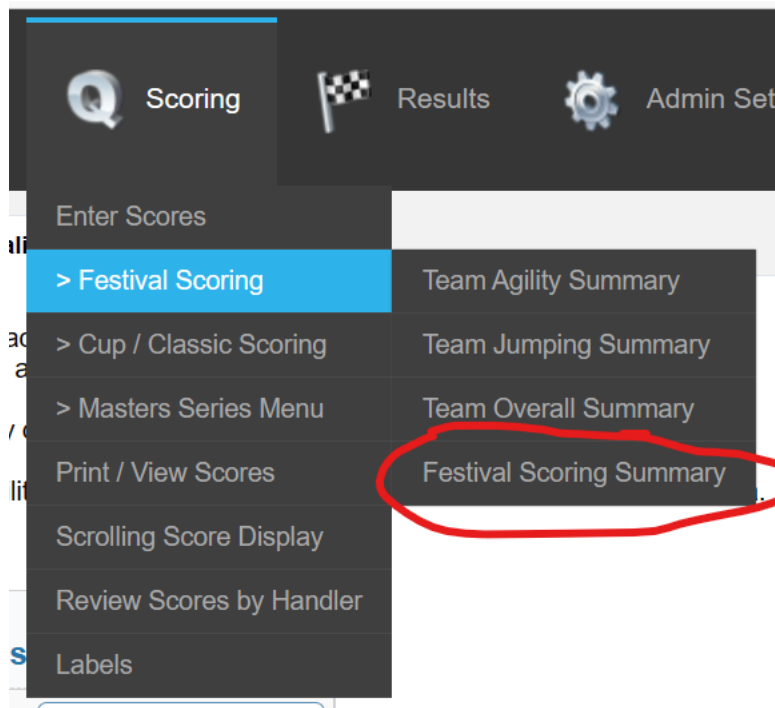

As of February 2023, UKI Manager has been enhanced to support the new Festival events offered by UKI. Festival events include a “Festival Winner” which is a combined Biathlon and Masters Series Heat, along with a Festival Winning Team.

Festival Winner

UKI Manager already supported Biathlon and Masters Series Heat tournament events.

To support the Festival Winner, a new Scoring option has been added under the new “Festival Scoring” menu.

The Festival Scoring Summary shows the combined Biathlon and Masters Series scores to show the winning dog in each height.

The Festival Scoring Summary assigns points for the dogs place in Biathlon and Masters Series, and adds those scores together to give the placement of the Festival Winner. An example is shown below:

Festival Teams

To support the new Team event, there were far-reaching changes to the system as we did not have any other events where multiple dogs were combined together.

This will highlight the changes to support Teams.

Show Setup

New field for the price of entering Team. This price is the total for the 3 dogs on the team, and includes the Team Agility, Team Jumping and Team Relay classes for each dog.

When a show has team classes defined, a new button will display on the Details page for the dog that will allow the team captain to enter the team name and member information. Note that this button will be hidden if the Details display is for a dog who was placed on a team by a captain already. In its place

you will see the team name and members listed.

Team Validations

There is a new menu option for validating the teams.

Team validation is an important process that must be completed before creating your run orders. The rules of Team include:

- 1 – A team dog can only be on one team.
- 2 – Only the Captain of the team signs up for the team. This means a Captain may signup for a festival, and one or both team members never send in their entries.

The validation process will inform you if there are issues, and these issues must be resolved.

Once there are no issues, **the system will generate Team Agility and Team Jumping entries** for all of the valid teams. You will then be able to reorder those classes as needed, and see them in the run orders, gate sheets, etc. This is important to understand, as there will not be any Team Agility or Jumping runs listed in the system prior to the validation of teams.

- ⑦ This validation will verify that each dog selected for a team has an Entry for the show.
Dogs without an entry will be displayed in **Red**

Also, a dog can only be on 1 team, so any dogs found to be on multiple teams will be displayed in **Blue**

Finally, when teams are all valid, the Team Agility and Team Jumping runs will be populated from the Team data.

The results of this Validation run shows a number of issues with dogs who have not yet been entered into the show, and one dog who has been specified on two teams. You can run this validation as many times as necessary. If it is determined that a team fell apart and needs to be removed from the system,

open the Details for the Captain and choose to Delete the team record.

② This validation will verify that each dog selected for a team has an Entry for the show.

Run Counts

Because of the way teams are handled, the individual Team Agility and Team Jumping runs are counted just like regular runs, but the Team Relay is a count of the number of Teams, not the total members. This is demonstrated here:
